FORAGE CROPS

MIXED FORAGE DIETS

Home grown feeds can help to produce an excellent part of a mixed forage diet. Understanding the feed requirements of your animals will ensure maximum returns.

Mixed forage diets will help increase intakes and ensure optimum rumen stability, improved feed utilisation and animal performance.

Many forages are better understood, leading to improvements in intake predictions, and accurate assessments for both energy and protein requirements.

The opportunity for UK farmers is to exploit the use of home grown forages and reduce their cost of production.

FORAGE CROPS - THE BENEFITS

- Improved profitability
- Reduced reliance on purchased feed
- Full traceability
- Flexible cropping options
- An excellent break-crop & entry back to grass
- Extend the grazing season
- Outwintering options
- Low inputs

LG ANIMAL NUTRITION GRASS MIXTURES

MEDIUM TERM LEYS (3-7 YEARS)

PROTEIN SILAGE

Produces a protein rich silage that minimises the need for supplementation of protein into the diet.

- ✓ The ideal complement to high energy feeds such as LG Animal Nutrition maize silage
- ✓ Includes red and white clovers to increase digestibility and palatability
- ✓ High sugar tetraploid grasses balance the high protein clovers and improve silage fermentation
- ✓ Includes Violin; the highest yielding White Clover on the recommended list
25% LGAN Red Clover Blend ■ 5% Violin WC ■ 70% Trintella/Eurostar IPRG (Tet)

SILAGE & GRAZING

A versatile mixture with a perfect balance of nutritional qualities when cut or grazed

- ✓ Includes varieties that express superior nutritional qualities under both grazing and conservation managements, to give improved animal performance
- ✓ High D-Value and digestibility fibre maximises nutrient availability and increase voluntary intakes
- ✓ High energy and sugar s fuels milk and meat production
- ✓ Includes LG Animal Nutrition White Clover Blend to increase palatability, mineral and protein content
35% Trintella/Eurostar IPRG (Tet) ■ 15% Solomon IPRG (Dip) ■ 20% Twymax LPRG (Tet)
23% Matiz LPRG (Dip) ■ 7% LGAN White Clover Blend

INTENSIVE GRAZING

A mixture formulated to maximise voluntary intakes and increase animal production from grazed grass

- ✓ Highly palatable and highly digestible tetraploid grasses increase the rate of digestion, leading to improved voluntary intakes
- ✓ Outstanding energy content means more milk and meat from every bite
- ✓ High sugars and digestible fibre improve digestion efficiency
93% Twymax/Aspect/Xenon/Drift LPRG (Tet) ■ 7% LGAN White Clover Blend

SHORT TERM LEYS (2-3 YEARS)

MAXIYIELD

For high yields quality silage

High yielding, fast growing cutting mixture designed to give maximum production of high quality silage or haylage over 2 years.

- 3.5kg Udine IRG (Tet)
- 2.0kg Belluna IRG
- 2.5kg Meribel IRG
- 2.5kg Hymer HRG (Tet)
- 2.5kg Scapino HRG (Tet)

Pack Size: 13kg

CLOVERCUT

High Protein, Multiple Cut

A 2/3 year cutting mixture consisting of tetraploid grasses and red clover to give top quality, highly nutritious silage.

- ✓ Big yields of high energy, high sugar, high protein silage.
- ✓ Fixes atmospheric nitrogen
- ✓ Cutting mix with aftermath grazing
- ✓ High sugar levels for good fermentation
- ✓ Now treated with Headstart Gold for improved establishment

- 4.0kg Amalgam (Tet)
- 4.0kg Scapino HRG (Tet)
- 3.0kg Red Admiral RC Blend

Pack Size: 11kg

MAXICUT

High Yields of Early Cut

A medium term cutting mixture designed to give high yields of early cut, top quality silage over a 4 year period or longer.

- ✓ Rapid spring growth ensure early first cut
- ✓ Close heading dates for high quality silage
- ✓ Ideal mixture for two cuts followed by a aftermath grazing
- ✓ High sugars for improved fermentation

- 4.0kg Montova IPRG (Tet)
- 4.0kg Pensel IPRG (Tet)
- 2.0kg Copeland IPRG
- 3.0kg Solomon IPRG

Pack Size: 13kg

GRAZE & CUT

Med/Long Term Dual Mix

Graze & Cut is a medium term dual purpose ley that will suit almost every farming situation.

- ✓ Can be grazed and/or cut over 5+ years
- ✓ Suitable for all classes of livestock
- ✓ Early spring growth can be used for a bulky first cut or early turnout
- ✓ Our most flexible non-timothy mixture

- 2.5kg Aubisque IPRG (Tet)
- 2.0kg Eurostar IPRG (Tet)
- 1.5kg Drumbo IPRG
- 3.0kg Drift LPRG (Tet)
- 2.0kg Copeland LPRG
- 1.0kg Foxtrot LPRG
- 1.0kg Ensign Plus WC Blend

Pack Size: 13kg

LONG TERM LEYS (5+ YEARS)

REAPER LEY MIX No.1

Long Term Dual Purpose Ley

A long term, dual purpose mixture that delivered outstanding performance for many years.

- ✓ Best selling mixture in our range
- ✓ Highly productive varied growing conditions from lowland to uplands
- ✓ Suitable for intensive and extensive systems, across all livestock types
- ✓ High yields, digestibility and flexibility
- ✓ Good ground cover for poaching resistance

- 2.0kg Contrast IPRG
- 2.0kg Premium IPRG
- 1.5kg Aubisque IPRG (Tet)
- 3.0kg Romark LPRG
- 3.0kg Twymax LPRG (Tet)
- 1.5kg Comtal Timothy
- 0.7kg Crusader WC
- 0.3kg Demand WC

Pack Size: 14kg
